The Geology of Natural Stone for The Stone Industry

Date: Wednesday, September 26, 2018
Time: 6:00-8:00PM
Speaker: Christopher Braaten
Senior Petrographer/Geologist
American Engineering Testing, Inc

Location: American Engineering Testing, Inc.
550 Cleveland Avenue North
St. Paul, MN 55114

Natural stone is a premier building product for the construction industry, however, the key to success is matching stone with the correct application. During this session, we will discuss the geology of natural stone and how this affects usage. Learn what to consider when selecting stone for countertops, wet areas or internal and external cladding. Create a plan for working with specifiers to match material to application.

Participants will learn:

- About the geological makeup of natural stone and how this effects stone selection.
- What attributes allow natural stone to excel in specific applications.
- How attributes of natural stone effect cutting, installation and sealing methods.

Registration Fees:

\$25 Chapter Participant; \$50 Non-Chapter Participant; Complimentary for Architects and Designers

Register now at www.naturalstoneinstitute.org/MW926
