

Award of *Merit*

PROJECT:

Barclay-Vesey Building (Ground Zero)
New York, New York USA

MIA MEMBER COMPANY:

Petrillo Stone Corporation
Mount Vernon, New York
Stonecarver, Fabricator & Installer

Limestone carvings on the landmark Barclay-Vesey Building in Manhattan that were destroyed during the September 11 attacks have been restored to their original splendor. Although much of the exterior is brick, the feature elements of the façade are limestone, including large cubic pieces and ornately carved panels. The project required 5,000 cu. ft. of Indiana limestone with 2,000 sq. ft. of carved surface area, and an additional 500 cu. ft. of Stony Creek granite for the base of the building.

JUDGES' COMMENTS:

“We recognize the complexity of the handcarving and commitment to difficult detail”...
“Impressed by the owner’s commitment to maintain the original design.”

OTHER PROJECT TEAM MEMBERS:

Architect: McKenzie, Voorhees and Gmelin Achitects • General Contractor: Tishman Construction Corp. • Stone Supplier: Furlong & Lee
• Stone Slabbing: Michael & Sons • Project Engineer: Merritt Engineering • Stone Quarriers: Victor Oolitic Stone Co., Granicor Inc.
