

Award of *Excellence*

PROJECT:

Private Residence
Cherry Hills, Colorado USA

MIA MEMBER COMPANY:

The Denver Marble Company
Englewood, Colorado
Stone Fabricator & Installer

The grand fireplace in this home measures over 7 ft. tall and 9 ft. wide. The Denver Marble Company used 2 cm Gascogne Beige slabs with several 3 cm-thick strips for the molding across the mantle. The “rams head”-style corbels on top of the fireplace legs incorporate 17 laminates stacked side-by-side. To give the appearance that the fireplace was built with heavy cubic stock stone, all components were mitered and/or laminated.

JUDGES' COMMENTS:

“Fabrication at its best”... “Great job of laminating with excellent craftsmanship”...
“Classic Italian design” ... “Fantastic fabrication of veneers”... “Subtle elegance.”

OTHER PROJECT TEAM MEMBERS:

Architect/Designer: Concept Studio • General Contractor: Newmyer Contracting
Stone Suppliers: Concept Studio, Walker Zanger
